About Us.

Introduction

PT. Kalibaja Tri Gemilang began its journey in 2021, initially providing coal mining manpower and shipment supervision services. In its early years, the company operated in a supporting capacity — placing skilled personnel in the field and overseeing the supervision of coal shipments for mining and trading partners. That groundwork gave the company a close, ground-level view of how mining operations actually run day to day, long before it took on contracting responsibilities of its own.

Coal is a natural resource of great value to the world's energy needs.

Building on that foundation, PT. Kalibaja Tri Gemilang evolved into a dedicated coal mining contractor licensed under IUJP (Izin Usaha Jasa Pertambangan). The transition was not a rebranding exercise but a natural progression — the company moved from supporting mining operations to directly executing them, carrying forward the field experience accumulated during its manpower and supervision years.

What started as a support role in the field has matured into a full operational capability, backed by experienced management and a focus on consistent, professional execution. PT. Kalibaja Tri Gemilang now stands as a coal mining contractor, positioning itself as a trusted long-term partner for mining companies seeking reliable contracting services.

Every operation is carried out with safety, legality, and accountability at its core, in full accordance with the regulations of the Government of the Republic of Indonesia. This is not treated as a baseline obligation alone — it is the standard against which every project the company undertakes is measured, from overburden stripping through to hauling.

Our Services.

Land Clearing & Site Preparation

Systematic preparation of mining work areas with full attention to safety standards and good mining practices.

Overburden Stripping & Removal

Stripping of topsoil and overburden layers to expose coal commodities, carried out efficiently and responsibly.

Loading & Fleet Management

Loading of overburden material into haulage fleets using high-capacity heavy equipment to ensure operational efficiency.

Hauling & Waste Dumping

Transportation of overburden to designated disposal areas in accordance with Good Mining Practice standards.

Vision & Mission.

Vision

A trusted name among Indonesia's coal mining contractors — a standing built through strong partnerships and consistent operational excellence.

Every project contributes to that growth, measured not by size alone, but by how responsibly and sustainably it is achieved.

Mission

- We build strategic alliances with mining companies, treating each partnership as a long-term commitment rather than a project-by-project arrangement.
- We develop long-term relationships with financial institutions and investors, recognizing that sustainable growth requires capital partners who understand the nature of the mining business.
- We support efficient and responsible mining operations, balancing productivity targets with safety and environmental obligations rather than trading one for the other.
- We create sustainable value for clients, employees, and stakeholders, so that the benefits of every project extend beyond the immediate contract.

Company Strategy.

PT. Kalibaja Tri Gemilang operates its commercial business with a distinctive approach, guided by the motto: **"Let us make the best use of the natural resources God has bestowed upon us, for the prosperity of all — the company, its employees, and the surrounding communities."**

PT. Kalibaja Tri Gemilang combines commercial performance with social responsibility while pursuing sustainable growth in the mining sector. The company does not treat these as competing priorities — operational targets are pursued in a manner that accounts for safety, legality, and the communities and environments in which mining activities take place.

PT. Kalibaja Tri Gemilang seeks strategic partnerships with mining companies, financial institutions, and investors to support expansion and operational excellence. This approach reflects the company's understanding that growth in the contracting business is rarely achieved alone — it depends on alliances that supply capital, project opportunities, and operational know-how in equal measure.
