

COMPANY PROFILE 2026

PT. KAOT ENERGI SEJAHTERA
SUPPLY & TRADING

ABOUT US

The story behind PT. Kaot Energi Sejahtera traces back to 2013, when its founder established a coal mining contractor (IUDP) operating in South Kalimantan, Indonesia.

For nearly five years, the company's founder operated at the production end of the coal business — managing extraction activities, coordinating with mine owners, and building a working network of local coal buyers along the way. That period provided firsthand insight rarely found in conventional trading companies: a ground-level understanding of how coal is actually produced, how its quality behaves under different mining conditions, and how supply chains break down when not managed carefully.

By 2018, this operational experience was channeled into a broader purpose. PT. Kaot Energi Sejahtera was founded in Surabaya to focus exclusively on coal trading for domestic and export markets. Indonesia's coal reserves remain substantial, and demand both at home and abroad continues to grow. The market, however, has long been dominated by PKP2B holders, leaving the remaining share to be served by independent traders, IUP OP license holders, and state-owned enterprises. PT. Kaot Energi Sejahtera was established to compete in that space — not as a conventional intermediary, but as a trading company that understands the production side of the business as well as the commercial side.

PT. Kaot Energi Sejahtera provides integrated coal supply and trading solutions for domestic and international markets, connecting producers and buyers through reliable supply chains and transparent business practices. Compliance is treated as the foundation that makes long-term relationships with business partners possible in the first place, not as a formality layered on top of operations.

PT. Kaot Energi Sejahtera continues to strengthen its position in the market by expanding its network of buyers and producers, while staying responsive to the shifting dynamics of the energy sector — fluctuating prices, evolving regulations, and changing demand patterns across the GAR specifications it serves.

VISION & MISSION

VISION

To become a professional coal trading company recognized for reliability, effectiveness, and value creation, while building strong partnerships with domestic and international buyers.

Every transaction reflects that ambition – built on consistency, fair dealing, and a long-term view of the market, rather than short-term opportunism.

MISSION

We deliver reliable coal supply and trading solutions, backed by verified sourcing and consistent specification across every shipment.

We maintain compliance with applicable regulations and quality standards, treating Indonesian law as the baseline rather than the ceiling of our obligations.

We continuously strengthen management capabilities and operational performance, so that our systems scale alongside our volume.

We conduct business with professionalism, integrity, and long-term commitment, prioritizing relationships that outlast any single transaction.

COMPANY VALUES

- Always act with honesty and uphold the highest integrity
- Always work together to maintain harmonious working relationships
- Always carry out responsibilities with full commitment and accountability
- Always perform professionally in every assignment
- Always empower co-workers through knowledge sharing

COMPANY STRATEGY

PT. Kaot Energi Sejahtera's corporate strategy reflects the company's perspective and direction toward the future. It is not fixed – it adapts continuously to the dynamics of business development and market conditions, because a strategy that cannot move with the market is one that will eventually be left behind by it.

The company pursues sustainable growth by expanding coal trading opportunities, strengthening strategic partnerships, and continuously adapting to changing market conditions. It also continues to explore opportunities beyond its current scope – including other forms of strategic cooperation in natural energy resources – in line with its vision and mission. Its focus remains on long-term value creation while preserving the flexibility a dynamic energy sector demands.

COMPANY STRUCTURE

BOARD OF DIRECTORS

COMMISSIONER: JUNJUNG HANDOYO PUTRO

DIRECTOR: SATRIA YUDA PERDANA PURBA KAOT, S.T.

MANAGEMENT

FINANCE & ACCOUNTING MANAGER: INNEKE SANDRANITHA, S.E.

TAX MANAGER: ALBERTH LIMANDAU ALIKIN, S.H.

LEGAL MANAGER: YOGI SAPUTRA, S.H.
